

Johan Jael López Reyes

Full-Stack Web Developer | Software Engineer

Education

Multiplatform Software Development Engineering | Technological University of Morelia (Graduation 2026).

Lenguajes

Intermediate English (B1) - Active improvement of skills with special attention to technical communication and remote work environments.

Professional Experience

Web Developer and Data Analyst | Azul Corporation

March 2026 - Present

- **Dynamic Site Development:** I designed and implemented SmartMatch-Analytics, a high-performance backend engine to process technical product equivalencies and calculate performance ranges in real time, improving the user experience.
- **API and Transactional Systems Integration:** I developed an automated web ecosystem for the Toluca 2026 Circuit, integrating asynchronous processing of REST payment APIs (Stripe) and real-time capacity control.
- **API and Transactional Systems Integration:** I developed an automated web ecosystem for the Toluca 2026 Circuit, integrating asynchronous processing of REST payment APIs (Stripe) and real-time capacity control.

Backend Developer and Systems Auditor | PIHCSA (Medical Sector)

October 2025 - March 2026

- **Creating Platforms from Scratch:** I developed and deployed a centralized web platform for the control and management of critical medical assets using Laravel, JavaScript, and MySQL.
- **Análisis de Requerimientos:** Traduje las necesidades operativas del negocio en módulos técnicos funcionales, reduciendo los tiempos de auditoría interna de semanas a solo horas gracias a la automatización del flujo de datos.
- **Requirements Analysis:** I translated the operational needs of the business into functional technical modules, reducing internal audit times from weeks to just hours thanks to the automation of the data flow.

Professional Profile

Software Engineer with extensive experience in full-stack web development using PHP (Laravel), JavaScript (React), and MySQL. Specialized in building dynamic websites from scratch, consuming and integrating REST APIs, and optimizing performance and user experience. Proactively focused on clean coding best practices, version control with Git, and deployment to production environments.
