

Johan Jael López Reyes

Software Engineer | Application Security Specialist (AppSec)

Education & Continuous Training

B.S. in Cross-Platform Software Development | Universidad Tecnológica de Morelia (Expected Graduation: 2026)

Professional Training in Cybersecurity | Independent & Continuous Learning (Focus on Information Security, Secure Networking, and Digital Forensics)

Languages

Languages: Intermediate English (B1) - Actively refining skills with a focus on technical communication and remote work environments.

Relevant Experience

Web Developer / Data Analyst | Corporación Azul

March 2026 - Present

- **Critical Architecture Development:**

Designed and implemented SmartMatch-Analytics, a high-performance backend analytical engine built to process technical product equivalences and calculate dynamic performance ranges.

- **Cybersecurity & Hardening:**

Lideré la reingeniería y el blindaje (hardening) de la infraestructura web tras una brecha de seguridad, ejecutando análisis de páginas web para mitigar y prevenir hackeos futuros.

- **Transactional Systems:**

Developed an automated registration ecosystem for the Circuito Toluca 2026, integrating asynchronous payment processing and a real-time perimeter capacity control system.

Backend Developer & Systems Auditor | PIHCSA (Healthcare Sector)

October 2025 - April 2026 (6 months)

- **Sensitive Data Protection:**

Led the development and deployment of a centralized platform for critical medical asset management using Laravel and MySQL.

- **Process Optimization:**

Implemented web security mitigation measures to harden the platform against common vulnerabilities, reducing internal audit cycles from weeks to just hours.

Software Engineer specializing in Laravel, MySQL, and JavaScript, with a strong focus on Application Security (AppSec) and OWASP risk mitigation. Experienced in data architecture, process automation, and payment gateway integration. Proven track record in securing critical infrastructure, enhancing cybersecurity, and operating in technical English environments.

Skills

Backend & Architecture:

PHP (Laravel), Python (Django), MVC, Eloquent ORM, REST APIs.

Frontend:

React, JavaScript, HTML5, CSS3 (Tailwind, Bootstrap).

Databases:

MySQL, SQL Server, MongoDB, Backup Management.

Cybersecurity:

Web vulnerability analysis, OWASP Top 10 mitigation (XSS, SQL Injection), data sanitization, server hardening.

Tools & Infrastructure:

Git, Access Control, workflow automation.
